PROFILE

4th-year Systems Engineering Student @ UTN & Full Stack Developer. I specialize in building Full Stack and IoT solutions focused on **clean code** and **best practices**. I prioritize high-level components and function reusability, using **structured directory patterns** to ensure scalability. I blend technical excellence with cross-disciplinary insights to solve complex organizational challenges.

TECHNICAL SKILLS

Frontend

- React, JavaScript, HTML, CSS, SASS, Tailwind, Bootstrap, Astro, Next.js, Shadcn

Backend & Databases

- Node.js, Express, Sequelize, Mongo, PostgreSQL, MySQL, SQLite, Supabase

DevOps & Tools

- Docker, Git, Github, Azure, AWS, Enterprise Architect, Compass, Postman, Clerk Auth

EDUCATION

Universidad Tecnológica Nacional F.R.L.P.

Information Systems Engineering - fourth level

2022 - Present

Cambridge First Certificate

B2 Certificate, score 179

2021

EXPERIENCE & PROJECTS

• Zenit Corp | Full Stack Developer | 2026

Engineered and shipped production-grade web features within a live e-commerce environment, integrating Shopify and fulfillment APIs to streamline order workflows at scale.

• Don Nicola | ERP | 2025

Built a full-stack ERP platform from scratch targeting SMEs. Architected a modular monorepo with feature-based directory structure (React, Express, Supabase, Docker), enabling end-to-end resource management across inventory, billing, and operations.

 [Website](#)

• Pulpad | Smart Padel Scoreboard | 2025

Designed and deployed an embedded firmware system (CircuitPython) for a real-time sports scoreboard. Architected a finite State Machine for game logic and a custom I2C memory driver, decoupling hardware sensors from application logic via a modular abstraction layer.

[Website](#) 

• Oros | Stats Manager | 2026

high-performance athletic management platform engineered to streamline performance tracking and sports analytics. Featuring a scalable three-tier architecture, multi-sport data visualization, and nutritional logging. g.
